SKILLIES.AI

FOUNDERS BATCH · 01

One day.
Real publishing.

Amazon KDP workshop · Learn the full publishing path, build an actual book in the room.

SUNDAY · APRIL 12, 2026
Espero · Malappuram, Kerala

₹ 999

WELCOME

Welcome. You're early to something.

This is Batch 01. The first formal Skillies.AI workshop. You're here before everyone else figures out what this is.

Your promise for today:

You will leave this room having built a real, publish-ready book using AI.

HOUSE RULES

Three rules for the next five hours.

01 Build, don't just listen.

If your laptop is closed, you're losing money. Open it. Keep Gemini open. Keep Canva open.

02 Ask anything.

No question is stupid. The one question you don't ask is the one that stops your first book.

03 Phones down unless you're taking a screenshot.

This class costs ₹999. Your attention is the actual price.

SCHEDULE

The day, at a glance.

10:00 – 10:30	Welcome · Why you're here · Who I am
10:30 – 11:15	The big picture: how Amazon KDP actually works
11:15 – 11:45	Niche: the one principle (we go light here — on purpose)
11:45 – 12:00	Chai break ☕
12:00 – 13:30	Hands-on: build your first book with Gemini
13:30 – 14:00	Lunch 🍛
14:00 – 14:45	Covers: the 80/20 that actually matters
14:45 – 15:15	KDP upload + the backend outline
15:15 – 15:35	Account safety: what gets you banned
15:35 – 15:55	The 50-day path + giveaway + internship
15:55 – 16:00	Group photo. Done.

I

PART ONE

Before we start —

Who is standing in front of you, and why should you listen?

THE HONEST VERSION

I did not start with KDP.

Before this worked, I tried almost everything else. Most of it failed. Some of it is still running.

Amazon KDP

What I'm teaching you today

I am not a ‘guru’. I am a researcher who also teaches. That is why I am standing here.

— Ehsan · Founder, Skillies.AI

THE CURRENT REALITY

Where I am now.

64

Books published across different niches

3 days

From blank page to a publish-ready book

Live

Real income proof — shown in this room, not on a slide

→ *In a few minutes, I will show you my actual dashboard. Not a screenshot. Live.*

THE THING NOBODY TELLS YOU

And I built this after my teaching hours.

If I can build a publishing asset on nights and weekends while running a school — you, with your full day free, have no excuse.

This is not about talent. It is about compounding small, boring days.

THE VISION

Why am I still teaching, then?

If my only goal was money, I would hire a team, publish more books, and shut this room down.

SKILLIES.AI — THE MISSION

Build the most trusted AI-income academy in Kerala. Teach AI skills that actually earn. Stop pretending theory is enough.

That is why you are here. You are not buying a class. You are witnessing Day 1 of an academy.

II

PART TWO

Why KDP. Why now.

The opportunity nobody is talking about yet.

“A book? How would I even write one? I'm not a writer.”

— Every single person before they started

THE BIG SHIFT

You don't write. AI does.

The books that sell the best on Amazon KDP right now are not novels. They are not memoirs. They are not academic.

They are simple, visual, useful books — the kind you can build with prompts.

> ***If you can describe a book out loud, Gemini can build it. Your job is to describe it well.***

PATTERN RECOGNITION

India has a habit of arriving late.

Every online-income wave started in the US or UK. We copied it only after it was already crowded.

Dropshipping	US/UK 2015	**India 2020**
Digital marketing	US/UK 2012	**India 2019**
Stock trading on apps	US/UK 2014	**India 2021**
YouTube as a career	US/UK 2013	**India 2020**
Instagram creators	US/UK 2016	**India 2022**

By the time we copied, the game was over. KDP is different — we are early.

THE WINDOW

KDP is still unsaturated. Here's why.

→

The stereotype stops 99% of people.

“Books? I can't write.” That sentence alone removes almost all of your competition.

→

AI made the skill gap disappear.

What used to need months of writing now needs a prompt chain and a few hours.

→

Amazon handles everything downstream.

Printing, shipping, payments, customer service, returns. You upload. They do the rest.

WHY THIS BUSINESS, NOT ANOTHER

The three beauties of KDP.

01

Time freedom

A book you upload once keeps earning. You do not trade hours for money. You trade effort once for income forever.

02

Location + character freedom

No office. No boss. No customers to talk to. No face to show. No team to manage. Just you and your laptop — anywhere.

03

Amazon does the rest

You never print a book. You never ship a package. You never refund a customer. Amazon's machine runs, you just feed it.

II

PART THREE

The four pillars.

The whole business, on one map.

THE MAP

Everything on KDP fits in four boxes.

1

Niche

LIGHT TOUCH

What kind of book, for who. We cover the principle — not the playbook.

2

Book creation

DEEP HANDS-ON

Actually building the book with AI. This is where most of today goes.

3

Cover design

PRACTICAL BASICS

The only thing customers see before they buy. Covered at the 80/20.

4

KDP backend

OUTLINE ONLY

The upload, the metadata, the royalty, the payout. Outlined live.

IV

PILLAR ONE

Niche — the light touch.

We won't teach research today. We will teach the principle.

AN HONEST WARNING

Why we go light on niche today.

Niche research is the single most valuable skill in KDP. It is what separates ₹5,000/month from ₹5 lakh/month.

If I taught you niche research today in full, you would have no reason to take the 50-day program. I would not do that for ₹999, and I would not do it to you.

What you will leave with today is the principle. That is enough to start.

WRITE THIS DOWN

The only principle that matters.

Low competition + high demand.

Not one or the other. Both. At the same time. In the same micro-pocket.

Beginners chase trending niches. Trending niches have 20,000 books already. You cannot fight that. You need the pocket nobody is looking at — but customers are still buying from.

THE THREE TRAPS

Where everyone gets it wrong.

01

Chasing trending niches

If you saw it on a YouTube video, 50,000 other people saw the same video. You are already late.

02

Picking niches you personally like

You are not the customer. Your taste is irrelevant. Data is the only thing that matters.

03

Going too broad

‘Fitness books’ is not a niche. ‘Meal tracker for PCOS’ is a niche. Specificity is the whole game.

EXAMPLES (NOT MINE)

Niches that exist — and are working.

These are real, working categories. None of these are the one I actually publish in. Consider them a menu, not a prescription.

Travel journals	Pet planners	Wedding planners	Meal prep trackers
Sleep trackers	Gratitude journals	Habit trackers	Fitness logs
Garden planners	Prayer journals	Anxiety workbooks	Budget planners

Don't pick from this list. Use it to train your eye for what a 'real niche' looks like.

MORE EXAMPLES

And these work too.

Recipe notebooks	Kids' activity books	Coloring books	Spot-the-difference
Sudoku / puzzle books	Word search books	Dot-to-dot books	Mindfulness journals
Reading logs	Wine tasting journals	Fishing logs	Homeschool planners

Notice the pattern: every single one of these is SIMPLE. No writing. No expertise. Just structure.

> *The best niches are the ones that look boring from the outside and print money from the inside.*

— The whole game, in one line

V

PILLAR TWO

Book creation.

This is where the next three hours live. Hands open, laptops open.

HANDS-ON

Today, we are building a spot-the-difference book.

Why this one? Three reasons:

01

Proven demand.

Kids, adults, elderly, bookstore gift buyers — all four segments buy these.

02

Fast to build.

A full book is a few dozen image pairs. Gemini can do this in a single session.

03

The process transfers.

Once you learn this, you know how to build coloring books, puzzle books, kids' activity books. Same method.

YOUR NEW BEST FRIEND

The tool: Gemini.

We are using Google Gemini for everything: outlining, image generation, edits.

Account	Any Google account works. If you don't have one, open it now — takes 2 minutes.
Plan	Free tier works to get started. If the 1-year student offer is still live, grab it today.
Browser	Chrome or Edge. Gemini runs cleanest there.
Backup tool	Photoshop if you already own it — not required.

THE MENTAL MODEL

The four-step prompt flow.

Every book I build uses this same pattern. Memorize it.

1

Master brief

One detailed prompt describing the whole book: theme, style, audience, tone, constraints.

2

Page outline

Ask Gemini to produce a numbered list of every page — what happens on each one.

3

Per-page prompts

For each page, a tight prompt that produces the actual image or content.

4

Edit prompts

Fix specific things: 'change the third hat to blue', 'remove the extra flower'. Precision work.

WHERE MOST PEOPLE FAIL

Step 1 — The master brief.

Bad prompts produce bad books. Everything after this step just compounds whatever you put in here.

WHAT YOUR MASTER BRIEF MUST CONTAIN:

Book type	e.g. spot-the-difference, coloring book, activity book
Audience	age group, reading level, gender, use-case
Visual style	cartoon, watercolor, flat vector, line art, photo-realistic
Theme	one central idea — jungle animals, under the sea, medieval castle
Page count	20, 30, 50 — be specific
Output format	8.5 x 11 inches, PDF-ready, black border
Don't-list	no text on images, no watermarks, no humans (or whatever you want excluded)

COPY-PASTE READY

Master brief — example you can steal.

PROMPT

```
I want to create a spot-the-difference activity book for kids aged 6 to 9.

Theme: jungle animals in their natural habitat.
Visual style: bright, friendly cartoon illustrations — flat color, clean black outlines, no text on the
images.
Page structure: 30 image pairs, each pair showing 7 differences, on a single 8.5 x 11 inch landscape
spread.
Background color: soft cream.
Do NOT include any watermarks, signatures, humans, or written labels inside the images.

For this first pass, give me a numbered list of 30 distinct jungle scenes suitable for a spot-the-
difference book — scene by scene, one line each.
```

Notice what this does: you're giving Gemini the whole book in one message, then asking for only Step 2 first.

LIVE DEMO

Stop looking at the slide.
Look at the screen.

I am going to run the master brief live. Watch what Gemini gives me.

TURNING A BRIEF INTO A SKELETON

Step 2 — The page outline.

Gemini should now hand you a numbered list — one line per page.

EXAMPLE OUTPUT FROM GEMINI:

```
01. A family of elephants at a watering hole at sunrise
02. A troop of monkeys swinging through tall vines
03. A leopard resting on a thick tree branch
04. A parrot and toucan sharing a fruit tree
05. A hippo and her calf in shallow river water
06. A zebra herd crossing a grass clearing
... (30 total)
```

YOUR JOB: read this list. Cross out weak ones. Ask Gemini to regenerate just those lines. Lock the final 30.

WHERE THE BOOK GETS REAL

Step 3 — Per-page image prompts.

Now you ask Gemini to turn line 01 of the outline into two actual images.

PROMPT

```
Using the style we locked (flat color cartoon, clean black outlines, soft cream background, no text, 8.5x11
landscape),

Generate TWO images for page 01: “A family of elephants at a watering hole at sunrise.”

Image A: the original.
Image B: identical to Image A with exactly 7 small differences.

The 7 differences should be subtle but spottable — change small objects, colors, or positions. Do not
change the main elephants' poses.
```

THE 10% THAT MAKES IT LOOK PROFESSIONAL

Step 4 — Edit prompts.

Image A came back. Image B has only 5 differences instead of 7. Don't regenerate from scratch — just edit.

```
"Add 2 more differences to Image B: change one bird from red to blue, and remove one rock from the foreground."
```

```
"In Image B, make the sun slightly smaller and shift it 5% to the right."
```

```
"Replace the third tree in Image B with a palm tree. Keep everything else identical."
```

```
"The elephant's tail in Image B is too long. Shorten it to match Image A."
```

Precision beats regeneration. Every regen costs credits and changes things you didn't want changed.

YOUR TURN

Start your master brief.

20 minutes. No talking. Just typing.

Pick a theme you actually care about.
Write the full brief using the template from two slides ago.
I'll walk around. Raise your hand if you're stuck.

WATCH FOR THESE

The five mistakes I see every single batch.

01	**Too vague.**	*'Make me a coloring book' is not a prompt. It is a wish.*
02	**Too many ideas in one prompt.**	*One brief = one book. Not three book ideas mashed together.*
03	**No style lock.**	*If you don't specify the visual style, every page will look different.*
04	**Skipping the outline step.**	*Jumping straight to images gives you a random pile, not a book.*
05	**Not saving the prompt.**	*Your master brief is your template. Save it in a doc. You'll reuse it 100 times.*

TECHNICAL SPECS

Sizes, counts, and the boring numbers.

Interior size	**8.5 × 11 inches**	*The standard for KDP activity and low-content books*
Page count	**80–120 pages**	*Sweet spot for spot-the-difference / activity*
Image pairs	**30–50**	*Each pair = 2 pages, plus intro + outro = total page count*
Paper type	**White, standard**	*Black & white interior is cheapest to print*
Bleed	**0.125 in per edge**	*Required for full-image pages*
File type	**PDF**	*KDP's upload format for manuscript AND cover*

COMPILE STEP

Assembling the PDF — Canva is enough.

1	**Create a new Canva doc**	*Custom size — 8.5 × 11 inches. Not Letter. Not A4.*
2	**Upload all image pairs**	*Drag-drop. Canva handles the mess.*
3	**Two images per spread**	*Image A on the left page, Image B on the right.*
4	**Add a title page + copyright page + credits page**	*Fixed template — you'll reuse it for every book.*
5	**Download as PDF (Print quality)**	*Not 'Standard'. Print. This matters for KDP's preflight.*

CHECKPOINT

Where should you be right now?

- ○ Master brief written and saved
- ○ Page outline generated and locked
- ○ At least 5 page-prompts run
- ○ At least 2 pairs fully edited and usable

If you are behind, that is fine. Raise your hand. I'll come to you.

VI

PILLAR THREE

The cover.

The only thing a customer sees before they pay.

> *A great book with a bad cover sells nothing. A decent book with a great cover sells for years.*

— **Every KDP publisher, eventually**

THE 80/20

Three rules. Follow them and 80% of covers will be better than the average KDP book.

01

Genre-signal first, beauty second.

A customer should know what category your book is in within half a second of seeing the thumbnail. If you look 'unique', you look unrecognizable.

02

Title readable at thumbnail size.

Customers see your cover at 150 pixels wide on their phone. If the title is not readable that small, you lose.

03

High contrast, one focal point.

One big thing. One clear color against the background. No clutter. Busy covers are invisible covers.

YOUR BEST FRIEND

The KDP Cover Calculator.

Amazon gives you a free tool that tells you exactly how big your cover file needs to be, down to the pixel. Use it. Every time.

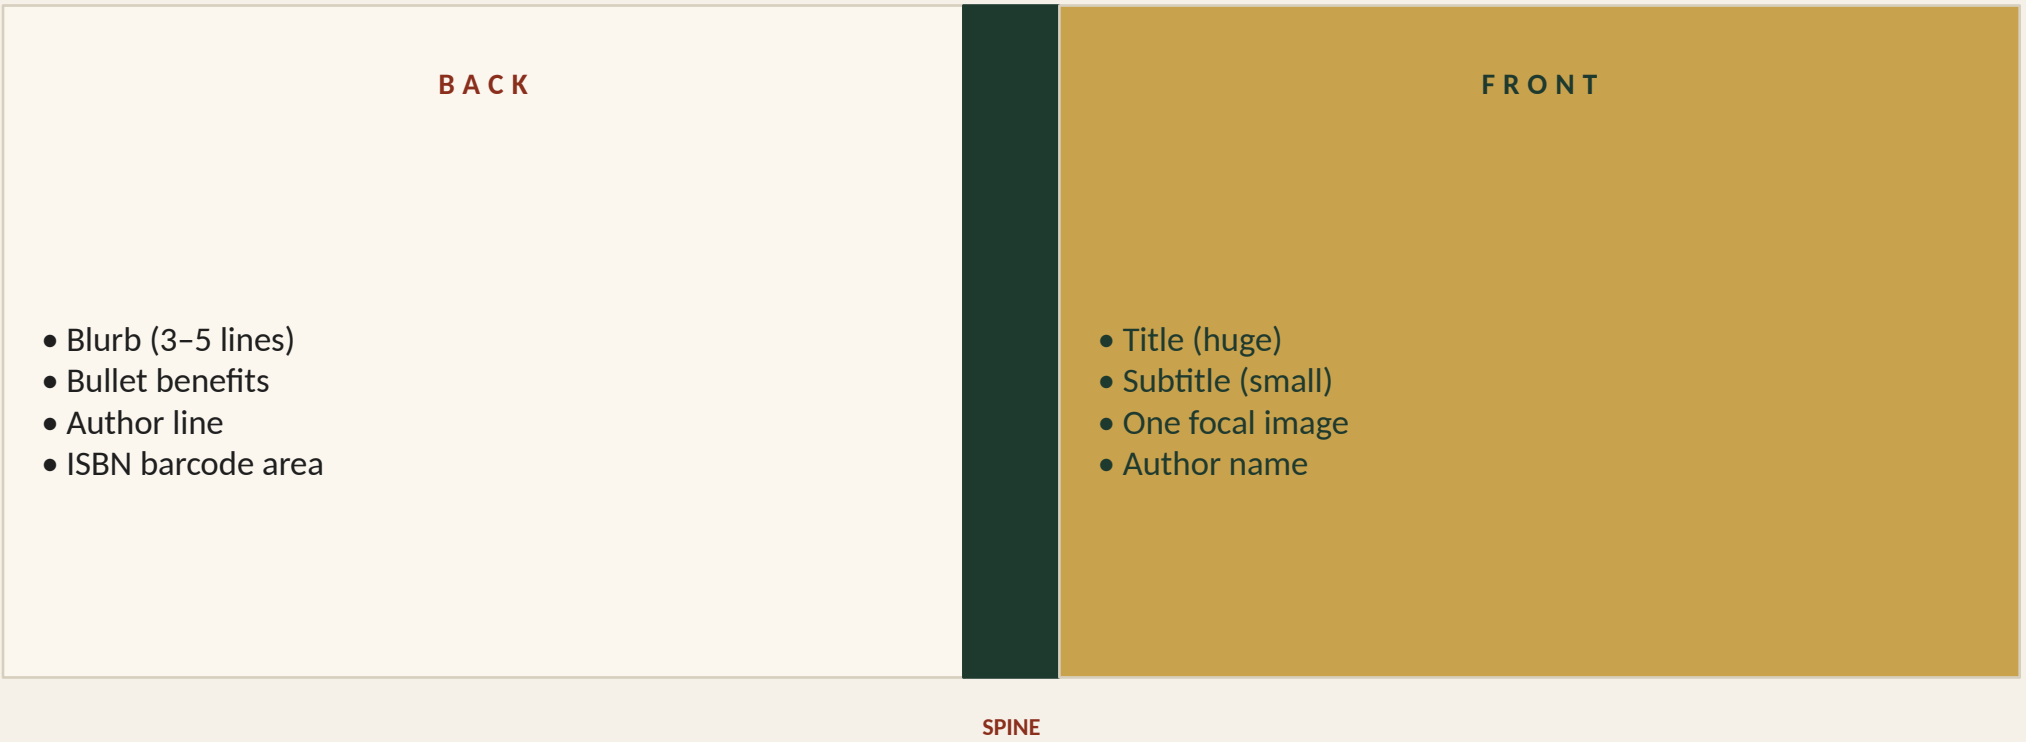
WHAT IT ASKS YOU:

- Interior size (8.5 × 11)
- Page count (80, 100, 120...)
- Paper type (white or cream)
- Binding type (paperback)

It spits out a PDF template. You drop your cover art on top of it. Done.

THE THREE PANELS

The anatomy of a KDP cover.



When you give this to KDP, all three panels come on a single PDF. The calculator tells you the exact width.

GO DEEPER LATER

Cover design is a skill. This is just the foundation.

In today's 5 hours, the cover block is the one I'm compressing the hardest. Here is where to go deep on your own:

YouTube — Self Publishing Titans	*The cleanest walkthroughs on KDP cover design.*
YouTube — Rafael Marquez / Book Bolt channels	*Good tutorials on designing with Canva and Book Bolt templates.*
Canva Templates	*Filter 'book cover' — plenty of free starting points for low-content books.*
BookBrush or Covervault	*Free 3D mockup generators to preview how your cover looks on Amazon.*

We will cover this in full depth during the 50-day program.

VI

PILLAR FOUR

The backend.

Upload, metadata, royalties, payouts. The plumbing.

HONEST LIMITATION

Why this section is just an outline.

Creating the KDP account, doing the tax interview (W-8BEN), linking a bank account — all of that is screen-by-screen work.

If I do it live for 20 people who all need to enter their own details, we lose 90 minutes. We don't have 90 minutes.

INSTEAD:

I'll show you the structure, and hand you a single YouTube link that walks you through every step at your own pace tonight.

THE MAP

The KDP backend, in 7 steps.

01 Create account at kdp.amazon.com

02 Complete tax interview (PAN + W-8BEN equivalent)

03 Link your bank for royalty payouts (direct INR deposit)

04 Start new title → enter title, subtitle, author name

05 Upload manuscript PDF and cover PDF

06 Pick 2 categories + 7 keywords (we touch this in 50-day)

07 Set price → publish → wait 72 hours for Amazon approval

After today, I'll send you the YouTube walkthrough link in the WhatsApp group.

THE ROYALTY MATH

How you actually get paid.

KDP pays you a royalty on every sale. Not a tiny one. 60% to 70% of the list price minus printing cost.

EXAMPLE — A PAPERBACK PRICED AT $9.99

List price	**$9.99**
Amazon's share (40%)	**-$4.00**
Printing cost (100 pages B&W)	**-$2.50**
Your royalty per copy	**$3.49**
Monthly if the book sells 50 copies	**~$175 / ~₹14,500**

Now multiply that by 25 books in a year. That's the compounding effect we're building toward.

A QUESTION EVERYONE ASKS

Pen name or real name?

PEN NAME

- You can use any name on the cover.
- Your bank account and tax forms stay under your real name.
- Safer if you don't want family or colleagues knowing yet.
- You can have one pen name per niche — one for kids' books, one for adult journals, one for planners.

REAL NAME

- Builds a personal brand over time.
- Good if you eventually want to do speaking, courses, interviews.
- Harder to separate niches — all books attach to the same author page.

THE BORING IMPORTANT PART

Tax, PAN, payouts — where most Indians get stuck.

Tax interview	KDP asks you to confirm your tax status. Indians fill the W-8BEN equivalent. Takes 5 minutes.
PAN card	Required. Make sure the name on your PAN matches the name on your KDP profile.
Bank account	Savings account is fine. Add a Direct Deposit (IFSC + account number). KDP pays in INR directly.
Minimum threshold	Most countries have a $100 minimum before first payout. India can be lower — check current policy.
Payment schedule	~60 days after a sale. So December sales hit your bank in February.

VI

CRITICAL

What gets you banned.

The warnings nobody gives you until after it happens.

TAKE THIS SERIOUSLY

Amazon bans faster than you think.

A banned KDP account is permanent. Amazon does not forgive. Your books get delisted. Your unpaid royalty gets frozen. Your identity gets flagged across all of Amazon's services.

The five triggers on the next slides are the ones I have personally seen end accounts. Write them down. Tape them to your wall.

BAN TRIGGER

#1 — Duplicate or plagiarized content.

Amazon's systems check every manuscript against a massive database. If your book reads like somebody else's book, you lose.

- Do not re-upload public domain content without transformation.
- Do not republish your own book under a different title.
- Do not use PLR (private label rights) content as-is.
- If you rewrite a competitor's book, rewrite it end-to-end — not paragraph by paragraph.

BAN TRIGGER

#2 — AI disclosure violation.

KDP requires you to declare AI use when you upload. There are three options. Pick the correct one.

AI-Generated	More than minor edits applied. Use this if Gemini wrote / drew most of it.
AI-Assisted	You wrote it, AI helped polish. For text-heavy books where you did the drafting.
No AI	Do not lie here. If you used Gemini, don't tick this one. Period.

For what we're building today (spot-the-difference with Gemini) — select AI-Generated. Always.

BAN TRIGGER

#3 — Trademark violations.

Using a brand or character name you don't own is the fastest way to get your book — and sometimes your account — killed.

- Don't put 'Disney', 'Marvel', 'Pokemon', 'Harry Potter' — anywhere.
- Don't use popular character names — Mickey, Elsa, Spider-Man, etc. — even in the interior.
- Don't use sports team logos or mascots.
- Don't use 'Bluey', 'Peppa Pig', 'Paw Patrol' — the kids' niches are full of trademark traps.
- When in doubt, search the USPTO trademark database (free, 2 minutes).

BAN TRIGGER

#4 — Review manipulation.

Amazon treats fake reviews like fraud. Because it is. The systems are machine-learning-sharp now.

- Do not ask friends and family to buy and review.
- Do not exchange reviews with other authors.
- Do not pay services that promise '50 verified reviews'.
- Do not join 'review pods' or Facebook groups that swap reviews.
- Do not incentivize reviews with free gifts or discounts.

BAN TRIGGER

#5 — Pricing manipulation + spam uploads.

The sneakiest category. Most new publishers trip on this without even knowing.

- Do not upload 30 books in 3 days. Amazon flags rapid bulk uploads.
- Do not use the same interior across 20 different titles (with only a cover swap).
- Do not price at $0.99 permanently just to game ranking algorithms.
- Do not copy competitor titles word-for-word.
- Do not keyword-stuff your title or subtitle.

Quality over quantity. Always. Always.

IX

PART NINE

Reality check.

What actually happens after today.

SET EXPECTATIONS

How long until your first sale?

If I told you 'tomorrow', I would be lying. Here is the honest timeline.

Week 1	You publish your first book. Nothing happens. This is normal.
Week 2–4	Amazon indexes your book. It starts appearing in search. First 1–3 sales trickle in.
Month 2	You publish book 2, 3, 4. You start seeing the compound effect.
Month 3–4	If your niche is right, one book starts outperforming the others. This is your winner. Double down on that pocket.
Month 6	Full picture emerges. You see what works, what doesn't. You cut the losers, scale the winners.

THE COMPOUND RULE

Why I tell students to publish 25 books.

One book is a gamble. Twenty-five books is a system.

Out of 25 books, realistically:

15	7	3
books	*books*	*books*
quietly earn a little	**earn nothing**	**carry the whole portfolio**

One of my books suddenly sold 39 copies in a single day. ₹20,000 in one day. From a book I'd uploaded months earlier and forgotten about.

— This is what 'asset income' actually feels like.

X

WHAT COMES NEXT

The path forward.

This class is Day 1. Here's what Day 2 looks like.

TAKE STOCK

What you just did in 5 hours.

You walked into this room today not knowing what KDP was. You are walking out with a book, a process, and a direction.

That is more than 99% of people who 'are thinking about KDP' will ever do.

BUT — you cannot build a ₹1 lakh/month asset in a single Sunday.

What you got today is the first mile of a ten-mile road. If you want the rest of it, the next slide is for you.

FULL DEPTH

The Skillies.AI 50-day academy.

The complete program. 50 days. Monday to Saturday. 10 AM to 4 PM. In the same room.

✓ **Full niche research system**

The thing we did NOT cover today. End to end.

✓ **25 books, not 1**

You leave with a real portfolio, not a toy project.

✓ **I publish alongside you**

4 hours every day, in the room, building books next to you. You see the process live, daily.

✓ **Covers, keywords, pricing, categories**

The whole metadata game, with templates and examples.

✓ **Direct feedback on your books**

Not recorded videos. Your actual files, reviewed.

✓ **Access to my actual publishing workflow**

Tools, prompts, and templates I use for my own books.

HOW IT WORKS

Payment — honest, staged, and cancelable.

I don't want your money upfront and your life in stress. Here is how payment is structured.

01

Day 1

₹30,000

Enrollment + first two weeks

02

Start of Month 2

₹30,000

Weeks 3–6

03

Start of Month 3

₹15,000

Final weeks + portfolio review

Total: ₹75,000. No hidden fees. No add-ons. No surprise costs.

BE HONEST WITH YOURSELF

Who this is for. And who it is not for.

THIS IS FOR

- People who will show up every day, on time, for 50 days.
- People who will do the work even when it feels pointless.
- People who can hear feedback without breaking.
- People who understand income takes months — not hours.

THIS IS NOT FOR

- People looking for a ‘one-click’ passive income shortcut.
- People who will stop after their first failed book.
- People who expect me to write the books for them.
- People who want to argue instead of build.

WHAT I WILL DO

My promise to anyone who joins.

→ I will be in the room with you 4 hours every single day, building my own books next to yours.

→ I will review every book you publish, personally, before it goes live.

→ I will share niches similar to mine — the ones I've tested — with a small number of you.

→ I will go to the end of the earth to make this work for you, as long as you show up.

XI

THE EXTRAS

Internships & the gift.

Two more things before we close.

LEARN BY BUILDING WITH US

The Skillies.AI internship.

I am taking a small number of interns to work with Skillies.AI directly. You build books with me. You learn the whole process from inside the business.

Duration	6 months
Compensation	Unpaid — the value is the skill and exposure, not the stipend
Who I'm looking for	Mostly education-related backgrounds. One graphic / design slot open.
Selection	Application form + mindset check. Skill helps, but mindset decides.
End-of-internship	You walk out knowing the full publishing process, inside and out.

THE GIVEAWAY

One of you gets in.

For free.

One seat in the 50-day academy. No cost. Announced at 15:40.

The person picked will be the one who did the most work in this room today.

XI

CLOSING

Before you walk out.

Four things. Then we're done.

THE ACTION PLAN

Your next 7 days.

Day 1 (tonight)	Watch the KDP account-creation YouTube link I send in the WhatsApp group.
Day 2	Finish polishing the book you started today. Every page clean.
Day 3	Design your cover using the Canva template.
Day 4	Run KDP Cover Calculator. Assemble the final file.
Day 5	Upload to KDP. Fill every field carefully. Submit for review.
Day 6–7	Wait for Amazon's approval. Start planning book two.

THE BATCH 01 GROUP

You are now inside the circle.

Every person in this room today joins the Batch 01 WhatsApp group.

- Direct line to me for questions over the next 30 days.
- KDP backend walkthrough video.
- Canva templates I'm sharing only with Batch 01.
- Announcements about the internship form.
- The 50-day program early-bird link, if you want it.

BATCH 01 · DONE

Thank you.

Now go publish.

@skillies.ai · Espero · Malappuram

The future of online income in Kerala starts in this room.
